

## Illuminating a Greener More Efficient Future

# Company Profile

### Lumisave Industrial LED Technologies LTD

We are a Canadian company established in 2009, specializing in Multi-Chip™ LED Technology. Multi-Chip™ Technology is the Next generation of LED. Multiple LEDs on a single chip create a high powered LED solution for today's energy minded industry.

#### Why LED?

- 1) Save energy and reduce maintenance costs
- 2) High performance and quality
- 3) Environmentally friendly

### Lumisave Advantages

- 1) Production & quality control completed at Lumisave's local manufacturing facilities.
- 2) All fixture components are tested to certified standards at the manufacturing facility
- 3) Multi Chip has 80,000 Hours+ lifespan
- 4) Multi-Chip produces 100 lumens per watt
- 5) Available in AC voltages from 110V to 600V
- 6) Hazardous Location Certified for Class I Div2 and Class II, Div 2
- 7) Rugged, weather-proof design
- 8) 5 Year replacement warranty
- 9) Up to 70% energy savings
- 10) Ability to customize each order to meet customer needs

### Commitment

We are committed to quality and reliability of our product. Using innovative technologies like the Multi-Chip LED and working closely with Certified Testing Agents, we are able to continue to provide better energy savings, and higher quality products to the customer.

Lumisave has also been able to provide custom products for our customers with unique applications because we have ability to design and fabricate new product in our manufacturing facility.
