

**TRUSTED, TESTED & PROVEN
INDUSTRIAL STRENGTH**

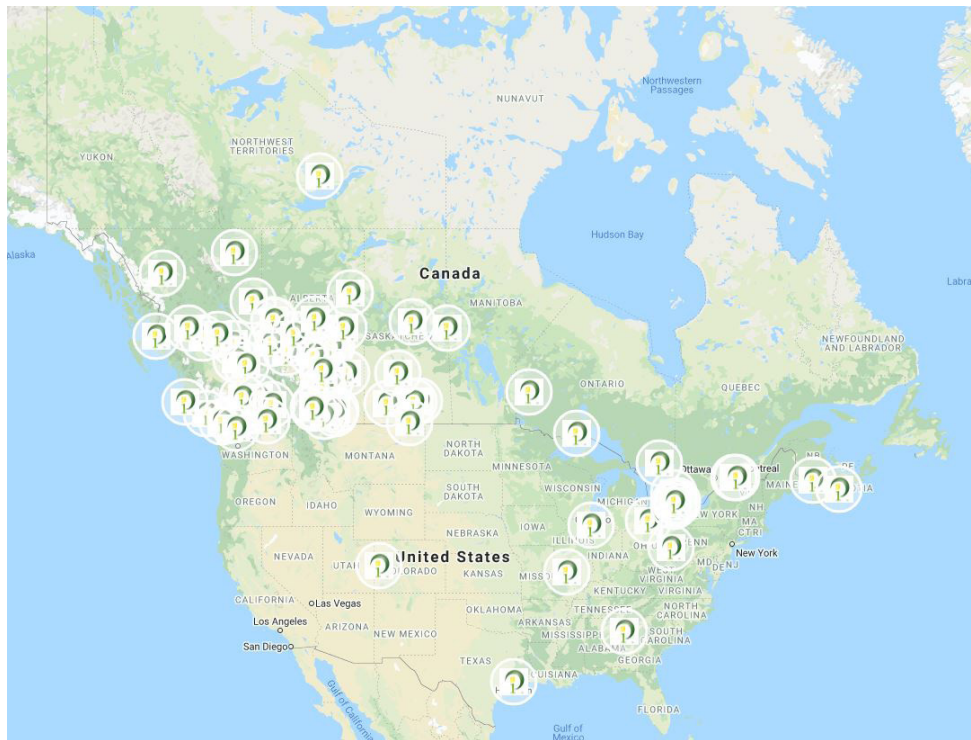

Lumisave™

ABOUT

Lumisave is a leading provider of high performance LED lighting solutions for commercial and industrial applications. Our rugged LED fixtures are specifically designed and engineered to withstand the harshest industrial environments and hazardous locations. With a broad array of research, development, test and production capabilities and facilities, our experienced team is dedicated to providing industry leading services and products. Established in 2009 Lumisave has grown to become a trusted name within a variety of industries having completed various major projects within the mining, forestry and oil gas fields. Lumisave continues to be a leader in lighting. Lumisave is proud to be known as a company that is focused on technical solutions. By working closely with each customer Lumisave is able to understand the needs and develop lighting solutions that save energy, reduce costs, improve safety and upgrade light quality.

Lumisave Customers Across North America

The Lumisave Advantage

- Assembled and Inspected for Quality in Canada!
- Available in AC voltages from 110V to 480V
- Rated 150 Lumens/Watt Output on our Samsung Chips
- 80,000+ Hours LED lifespan
- Hazardous Location Certified for Class I Div 2/Zone 2, Class II Div 2 & Class III Div 2
- 5 year replacement warranty
- Ability to customize each order based on each customer's specific needs
- Rugged, weather proof design ready to tackle the harshest climates.

We are committed to quality and reliability of our product Using innovative technologies and working closely with certified testing agents, we are able to continue to provide better energy saving and higher quality products to the customer. Lumisave has also been able to provide custom products for our customers with unique applications because we have the ability to design and fabricate new products in our manufacturing facility.

COMMITMENT

At Lumisave our commitment to sustainability and the environment, comes second only to our commitment to provide high quality, durable LED lighting products which are designed, tested and manufactured in Canada to meet North American Standards.

We pride ourselves on product quality and sustainability, by building a more durable product, ensuring less replacement fixtures, there is less need for rare earth materials which helps to ease the global demand.

All of our products are proudly manufactured in Canada because we believe in supporting the communities that support us. Not only is our durable product a great fit for heavy industrial applications in sectors such as mining, forestry, and oil and gas but our dedicated sales team will ensure the right fit for all of your LED lighting needs.

WHATS IMPORTANT TO US

Vision

With a focus of continually improving our product and service quality, Lumisave will continue to grow and become a leader in the LED lighting industry. We understand the value in being able to adapt quickly in the ever-changing market conditions to provide our customers with quality and functional products.

Service

Lumisave takes pride in providing unmatched service support for all of our customers, offering lighting audits, lighting layouts & custom designs to fit any unique application.

Quality

Each fixture is assembled by hand and inspected for quality by our in-house lighting technicians ensuring consistent product quality.

Local Manufacturing

All Lumisave products are assembled at our Prince George, BC location, significantly improving lead times and decreasing any downtime on site.

CUSTOMER TESTIMONIALS

Tolko Industries - Slave Lake

The Athabasca sawmill is the largest continuous OSB press in North America. Lumisave worked closely with Tolko to help them optimize safety on their sites by improving lighting levels while cutting down on light pollution and operating costs. Our lights typically last up to 70% longer than the lights they were using before, and they use less energy as well. Lumisave provided various fixture types ranging from our BL550 Series to our FL550 Series by providing a comprehensive lighting studies for Tolko, Lumisave was able to identify the optimal fixtures to replace the existing HID Lighting with minimal installation changes.

Endako Mine - Fraser Lake, BC

The Endako Mine is a primary, surface molybdenum mine located near Fraser Lake, 100 miles northwest of Prince George, British Columbia. The Endako Mine is a fully integrated facility that began operations in 1965. It includes a concentrator that processes ore through crushing, grinding, and flotation circuits into molybdenum disulfide concentrate, and a multiple-hearth roasting facility that converts the concentrate into technical grade molybdenum oxide. Endako Mines has been able to comply with all applicable environmental legislation and regulations. Our lights have helped them to cut down on light pollution and also operating costs. Our lights typically last from 50-60% longer than the lights they were using before, and they use less energy as well. Our lighting has helped Endako Mines to ensure the safety of their employees by providing much better and more even light in dangerous locations.

Cenovus - Christina Lake

Cenovus Energy Inc. is a large scale integrated energy company. As the Christina Lake project continued to grow, it's no surprise that an industry leader in the energy field started looking for options to optimize their lighting on site. The Lighting Project for Christina Lake Phase 1F was designed by ABB in partnership with Lumisave, implementing the use of LED lighting to reduce energy usage and light pollution. By working closely with ABB and Cenovus the lighting types that were in place for previous use were all able to be identified and replaced with a high efficiency LED solutions.

Prince George Curling Club

The Prince George Curling club has 8 sheets of curling ice and has hosted many provincial and national tournaments. In 2015 the club played host to the Canada Winter Games Curling Competition. The Lighting project for the Prince George Curling Club was designed and provided by Lumisave, implementing the use of LED lighting to reduce energy usage and increase lighting quality within the building. The Curling club is an important part of our community and Lumisave wanted to show support for its local businesses. Lumisave installed the BL 520 SERIES Bay Lights. The curling club is very happy with the new lights and they will be a huge help for televised events in the future.

EXPLOSION PROOF LIGHTING - XBL & XFL

Industrial Protection, Industrial Strength

The XBL Series Bay Light or the XFL Series Flood Light is the perfect solution for all explosion proof lighting applications. This fixture provides high output LED's along with high quality construction offering industry leading performance and durability for your hazardous area lighting needs.

Applications

- Oil & Gas Facilities
- Electrical Buildings
- Mining Environments
- Forestry Facilities
- Indoor / Outdoor Applications

AT A GLANCE - LNL & BL420

With the Lumisave Industrial Bay Light Series you can have complete confidence knowing you've got one of the toughest lighting products on the market. Designed with industrial environments in mind, these fixtures are able to withstand the wear and tear of the everyday use on industrial sites large or small.

HEAVY INDUSTRIAL SERIES - FL395 & FL375

Industrial Protection, Industrial Strength

The Heavy Industrial LED fixture series, designed from the ground up by Lumisave, are built to stand up to extreme conditions often seen in the coal and many other heavy industrial industries. The goal was to create a series of fixtures which offer more protection and are able to withstand the toughest conditions.

Applications

- Oil and Gas processing facilities
- Mobile drilling rigs and service equipment
- Offshore oil platforms
- Chemical plants
- Saw mill and other wood-processing facilities
- Food processing plants
- Manufacturing facilities
- Mining Operations
- Yard Lighting
- Pole Mount Applications

UNIVERSAL MOUNTING SYSTEM (UMS)

Lumisave has developed a unique Universal Mount suitable for any application or hazardous location. Our heavy duty mount can easily hold our heaviest Bay Light units while providing a chainable wiring connection that can have dry, wet, or hazloc connections. The UMS is intended to replace all existing Wall-Mount and Stanchion-Mount applications currently in place. The 3 section design allows for a straight (0°) or angled (22.5°) mounting by simply turning the center wiring compartment 180° at time of installation. With the addition of a wiring compartment located on the body of the mount, this allows for improved convenience of installation and maintenance. The 5 point 3/4" NPT wiring access points on the wall mount base allow for multiple Dry/Wet location wiring types and configurations including Teck Cable, BX cable, EMT and Rigid conduit.

UNIVERSAL ADAPTOR PLATE (UAP)

Lumisave has developed an Adaptor Plate suitable for any retro fit application that replaces old Crouse-Hinds HID fixtures. Our adaptor plate can accommodate the BL Series fixtures while providing quick and easy installation. The UAP is intended to replace all existing VMV and DMV Wall-Mount and Stanchion-Mount applications currently in place. The simple design allows the installer to remove the existing HID fixture while leaving the wiring and mounting base in place and with the adaptor plate installed on the appropriate BL Series fixture simply hang the plate on the existing base, connect the fixture wire to the existing wiring and close up. The UAP allows your next lighting upgrade project to be Quick, Easy and Cost Effective.

HALO LIGHTING

WHO IS HALO LIGHTING?

HALO was developed in the year 2010 as a highly specialized LED strip lighting system which was designed to thrive in the harshest environments on earth and under the earth where all other lighting systems fail; every aspect of the design, component & functionality of HALO was meticulously considered & professionally engineered to realize this premium lighting system without equal in the anywhere in the world.

Originally designed for use in underground mines, HALO can function optimally in high moisture & high ambient temperatures conditions, withstanding rugged handling and continuously on and never switching off; its tested and proven success in this most destructive environment clearly defines it as a market leader in all genres including residential, architectural, commercial, industrial, mining, marine, submarine, military and any other application where lighting may be required.

The HALO 2nd Generation product line launched in the year 2017 deemed the “Constellation Series”, is a masterpiece of technology and functionality, boasting massive leaps forward in every aspect which made the 1st Generation so successful, and boldly overcoming the challenges encountered through years of in the field testing at diverse and challenging installations around the world, it is “the evolution of illumination” with massive improvements in every facet including technology, performance, functionality and affordability and quite simply in a class of it’s own.

LUMISAVE & HALO

As Lumisave’s focus has been within providing industry leading lighting solutions to various heavy industrial industries for both general and hazardous location applications, a synergistic relationship has formed. Lumisave is able to provide it’s existing and future customer base with a wide ranging product line focused on the same core principles Lumisave has been founded upon.

COMMITMENT

At Lumisave our commitment to sustainability and the environment, comes second only to our commitment to provide high quality, durable LED lighting products which are designed, tested and manufactured in Canada to meet North American Standards.

We pride ourselves on product quality and sustainability, by building a more durable product, ensuring less replacement fixtures, there is less need for rare earth materials which helps to ease the global demand. All of our products are proudly manufactured in Canada because we believe in supporting the communities that support us. Not only is our durable product a great fit for heavy industrial applications in sectors such as mining, forestry, and oil and gas but our dedicated sales team will ensure the right fit for all of your LED lighting needs.

WHATS IMPORTANT TO US

Vision

With a focus of continually improving our product and service quality, Lumisave will continue to grow and become a leader in the LED lighting industry. We understand the value in being able to adapt quickly in the ever-changing market conditions to provide our customers with quality and functional products.

Service

Lumisave takes pride in providing unmatched service support for all of our customers, offering lighting audits, lighting layouts & custom designs to fit any unique application.

Quality

Each fixture is assembled by hand and inspected for quality by our in-house lighting technicians ensuring consistent product quality.

Local Manufacturing

All Lumisave products are assembled at our Prince George, BC location, significantly improving lead times and decreasing any downtime on site.

MINING APPLICATIONS

Our Commitment to the Mining Industry

Being situated in the industry rich Northern British Columbia region, some of our first products were developed specifically for the harsh mining environments seen in Northern and Western Canada. This industry demands rugged lighting products that are able to withstand some of the most unforgiving environments. By working with various mining partners we have been able to develop patented products exclusive to Lumisave, specifically for what the industry requires. In addition to heavy industrial fixtures, while working with the mining industry over the years we have been able to develop an industry-leading service repair program allowing for the most sustainable solutions for repair and re-use. Unmatched product quality and service has allowed Lumisave to grow to become a trusted name in Industrial Lighting.

Available Special Service Program:

Understanding the harsh working environments of heavy industrial sites, Lumisave, offers a special service program where our qualified lighting technicians, in most cases, can repair your fixture back to a safe, clean and reliable working condition. This would be for such circumstances not otherwise covered by our 5 year limited warranty such as cracked housings, broken lenses, and many other possibilities that can result from being located in heavy industrial locations.

We also offer to hold replacement stock at our warehouse to be sent out once we receive any repairs to help minimize any downtime.

Contact us directly.

ENERGY INDUSTRY

Our Commitment to the Energy Industry

Lumisave has become a trusted name in the Oil & Gas Industry through adaptation and engineered solutions. By working closely with engineering firms responsible for lighting design on major Oil & Gas sites, Lumisave has been able to provide lighting solutions that meet and exceed the status quo. Our vast product offering allows us to provide solutions for all aspects of Oil & Gas lighting such as catwalks, temporary work lighting, tank farms, pipe racks etc. Our localized production and industry leading after sales support allow us to address any issues that may be encountered on site, greatly minimizing any downtime for our customers.

We have had the pleasure of working with energy industry leaders including Suncor, Cenovus, Imperial Oil, Gibson Energy & Arc Resources.

FORESTRY APPLICATIONS

Our Commitment to the Forestry Industry

Lumisave offers an extensive range of products and solutions designed specifically to withstand the rigors and hazards of the forestry industry and the great communities that surround them. Proven products that operate safely and reliably in the most hazardous and corrosive environments, coupled with industry leading sales and service support, provide a best-in-class solution for forestry mills, processing plants, high-temperature locations along with all other forestry related applications.

Our localized production and industry leading after sales support allow us to address any issues that may be encountered on site, greatly minimizing any downtime for our customers.

1-855-563-7284

TRANSPORTATION INDUSTRY

Our Commitment to the Transportation Industry

Lumisave offers an extensive range of products and solutions designed specifically to withstand the rigors and hazards of the marine, rail and transportation industries within the various challenging environments of the world.

Proven products that operate safely and reliably in the most hazardous and corrosive environments, coupled with industry leading sales and service support, provide a best in class solution for offshore platforms, rail yards, transportation vessels, ship owners, shipyards, OEMs, and other transportation applications.

Our localized production and industry leading after sales support allow us to address any issues that may be encountered on site, greatly minimizing any downtime for our customers.

ENGINEERING STUDIES & LIGHT AUDITS

Let Lumisave be a part of your story, by providing no obligation energy studies, we work with your team to ensure your lighting needs are being utilized to its full potential.

Lumisave offers its customers detailed cost of ownership studies. These studies outline projected maintenance savings and how Lumisave's energy efficient LED's can provide equal or better lighting at a fraction of your energy spend. Our goal is to provide engineered solutions that will meet or exceed any lighting project's needs.

Site Specific Support:

Our highly skilled team is equipped with the tools and training to provide a thorough analysis of your current lighting system. With this highly detailed evaluation, we are able to engineer a unique solution to best accommodate any specific needs.

At a Glance:

- ROI (Return on Investment) report
- Details the feasibility of your lighting upgrade, highlighting the project cost vs. energy savings.
- Grants / Incentives rebates
- Our team will ensure that any applicable incentives are utilized for further project savings.
- Engineered Solutions Instead of 1-1 replacements of existing lighting, our team ensures optimal lighting levels and placements are accounted for to provide the best solution for your lighting needs.

The Lumisave Difference:

- 3D LED Lighting Layout Design and Rendering Services
- Project Specific Specifications
- Lighting Audits
- Shop Drawings
- ROI (Return On Investment) Reports
- Lighting Design

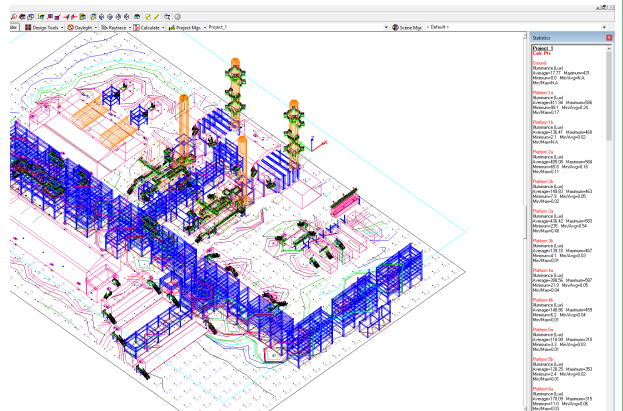

**Typical Walkway Lighting
Rendering (Dialux Software)**

Working closely with various EPCs (Engineering, Procurement, Contracting) over the years, Lumisave has provided extensive lighting design assistance for various large scale industrial projects. When provided with the site NavisWorks or SP3D drawings, site specific lighting requirements & lighting target levels, Lumisave can provide detailed 3D lighting design & rendering services to ensure our products performance for any industrial

With site specifications (target lighting levels, site drawings) in place, our team will recreate site specific conditions within our lighting design software. With the recreated site in place, lighting placement and design begins to achieve target lighting levels.

With the proposed lighting design in place, Lumisave provides a summary report on the various locations on site with the corresponding lighting levels.

WARRANTY

LUMISAVE 5 YEAR WARRANTY

Lumisave Industrial LED Technologies Ltd. (“Lumisave”) warrants for the Warranty Period, with the limitations below, to the first user that all Products manufactured by Lumisave, when properly installed and maintained under normal service, are free from defect in material and workmanship. The Products covered by this warranty are products manufactured by Lumisave in Canada that incorporate LED lighting multi chip using Lumisave’s Multi Chip TM LED lighting technology and that are manufactured and used for purposes of commercial, industrial, street lighting, parking lot lighting or area lighting.

The Warranty Period begins on the date of manufacture of the Product stamped on the Product and ends five (5) years thereafter. A Defect in the LED will be deemed to exist in a Product if there has been greater than 30% degradation in light output over the Warranty Period.
